Yahoo in Microsoft Outlook Express

1. From the Tools menu, choose "Accounts."
2. Select the "Mail" tab.
3. Click the "Add" button.
4. From the Add menu, click "Mail."
5. In the text box labeled Display Name, type your name and click "Next."
6. In the Email Address box, type your Yahoo! Mail address (be sure to include "@yahoo.com") and click "Next."
7. Under "My incoming mail server is a..." select "POP3."
8. Type "pop.mail.yahoo.com" in the Incoming Mail (POP3, IMAP, or HTTP) Server box.
9. Type "smtp.mail.yahoo.com" in the Outgoing Mail (SMTP) Server box.
10. Click "Next."
11. In the Account Name box, type your Yahoo! Mail ID (your email address without the "@yahoo.com").
12. In the Password box, type your Yahoo! Mail password.
13. If you want Outlook Express to remember your password, check the "Remember password" box.
14. Do **not** check the boxes labeled "Log on using Secure..."
15. Click "Next."
16. Click "Finish."

Important: The Yahoo! Mail SMTP server now requires authentication. To turn this setting on:

1. From the Tools menu, choose "Accounts."
2. Select the "Mail" tab.
3. Double-click the account labeled "pop.mail.yahoo.com."
4. Select the "Servers" tab.
5. Check the box next to "My Server Requires Authentication."
6. Click "OK

If your ISP blocks port 25 or if you're unable to send email, then you will need to use port 587 when sending via Yahoo!'s SMTP server. To make this change, please follow the directions below:

1. From the "Tools" menu, select "Accounts"
2. Select your Yahoo! POP account and click on the "Properties" button
3. Click on the "Advanced" tab
4. Next to "Outgoing server (SMTP), change port 25 to 587
5. Click "Apply", then click "OK" and "Close"
